

INSTYLAN

Sterile Solution based on hyaluronic acid for intravesical irrigation

QUALITATIVE COMPOSITION

Sodium hyaluronate.

Excipients: Water for injection, Sodium Chloride, Phosphate buffer

CLASSIFICATION OF THE PRODUCT

Medical device - sterilized and pyrogen-free - Class IIa.

PACKAGE

50 ml pre-filled disposable plastic bag which contains 0.16 % (80mg/50ml) of hyaluronic acid solution.

⚠ Each Package contains:

- 1 plastic bag containing INSTYLAN Sterile solution. The medical device has been sterilized by steam sterilization

INDICATIONS

INSTYLAN is intended for irrigation into bladder cavity that provides the formation of a viscous elastic film on the surface of mucous layer to:

- protecting it from external effects during various surgeries (ureteroscopy, cystoscopy, transurethral resection of adenoma and radiation therapy of lesser pelvis organs, etc)
- protect it from the harmful impact of bladder content (urina) in case of injury or from inflammation of the mucous layer of the bladder, like cystitis.

INSTYLAN is intended for irrigation of the bladder when using a urological catheter. The irrigation provides temporary protection and restoration of

bladder mucous layer during various surgeries (urethra cystoscopy, radiation therapy, etc).

WARNINGS AND SPECIAL PRECAUTIONS FOR USE

- Do not use if the solution is not transparent and colorless.
- Do not use if the packaging has been opened or is damaged.
- The product must be used immediately after opening.
- The product is intended for single use. After use, the unused product is no longer sterile. Do not use product residuals;
- Do not reuse. Once the product has been used for the first time, any residuals of the product are not suitable for the repeated use as the product is no longer sterile.
- Do not resterilize. Repeated sterilization may cause cross-contamination.
- Do not freeze.
- The product must not be administered orally.

SPECIAL WARNING

- Do not use the Solution in patients with known hypersensitivity to hyaluronic acid, or those with a history of allergic reactions to any component of the product.
- Irrigation into the bladder should be provided by a trained medical specialist in specialized premise with appropriate equipment and aseptic conditions.
- Do not inject the solution into blood vessels.
- Do not use the product with pregnant or lactating woman, or children.

ADVERSE REACTIONS AND SIDE EFFECTS

None.
